

New Source Review newspaper advertisements for construction permit applications, May 18, 2006. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: May 16, May 17, or May 18, 2006. Public notices are generally published every two weeks. The previous publication of public notices was May 2 – 4, 2006.

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is National Coal Corporation with a mailing address of 8915 George Williams Road, Knoxville, TN 37923. They seek to obtain an air contaminant permit (Division identification number: 07-0129-01/59333) to modify an existing Coal Preparation Plant at Lick Fork Road, Pioneer, TN 37847. This existing operation consists of coal stockpiles and crushing, screening, conveying, transfer and loading operations, and is used to produce stoker coal. Wet suppression is used for control of particulates (TSP). The requested modification is to increase the production rate and allowable operating hours. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. T. Blake is the assigned Division person.

For the Campbell County "Lafollette Press" -- published once on or before Thursday, May 18, 2006.

The applicant is Trinity Marine Products, Inc. with a mailing address of P.O. Box 568887, Dallas, TX 75356-8887. They seek to obtain an air contaminant permit (Division identification number 11-0039-01/59598) for modification of a Surface Coating Operation located at 1050 Trinity Road, Ashland City, TN 37105. This existing operation consists of outdoor painting of river tank barges. The requested modification is to construct a building enclosure to avoid delays in painting due to inclement weather. Exhaust filters would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. M Ahmed is the assigned Division person.

For the Cheatham County "Ashland City Times"--published once on or before Thursday, May 18, 2006.

The applicant is Liquid Recovery at Zanini Tennessee, Inc. with a mailing address of 1190 Hancock Chapel Road, New Salisbury, IN 47161. They seek to obtain an air contaminant permit (Division identification number: 26-0105-01/59373) for construction of a Solvent Recovery Operation at 840 Industrial Park Drive, Winchester, TN 37398. This proposed operation would consist of a portable liquid separation unit used to recover target solvents from the liquid waste generated at Zanini Tennessee, Inc. The recovered solvents would then be stored for reuse by the facility. A diesel generator would be used to power the unit. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. M. Smith is the assigned Division person.

For the Franklin County "Herald-Chronicle"--published once on or before Thursday, May 18, 2006.

The applicant is Vulcan Materials Company with a mailing address of P.O. Box 7, Knoxville, TN 37901. They seek to obtain an air contaminant permit (Division identification number: 37-0010-01/59111) for modification of a Rock Crushing Operation located at 417 Shepard's Chapel Road, Rogersville, TN 37857. This existing operation consists of crushing, screening, and conveying equipment used to produce crushed stone. Wet suppression is used for pollution control. The requested modification is to increase the production rate. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. T. Blake is the assigned Division person.

For the Hawkins County "Rogersville Review"--published once on or before Thursday, May 18, 2006.

FIRST APPLICANT

The first applicant is Bodine Aluminum Inc. with a mailing address of 100 Cherry Blossom Way, Troy, MO 38305. They seek to obtain an air contaminant permit (Division identification number: 57-0284-07/58989) to construct a Shot Blasting Operation at 301 James Lawrence Road, Jackson, TN 38301. This proposed operation would be utilized in conjunction with high pressure casting operations. Emissions from the primary piece of equipment would be controlled by a baghouse. There would be physical construction. Regulated air contaminants would be emitted from this source. Ms. Angela Pitcock is the assigned Division person.

SECOND APPLICANT

The second applicant is U.S. Silica Company with a mailing address of 105 Burkett Switch Road, Jackson, TN 38301. They seek to obtain an air contaminant permit (Division identification number: 57-0207-01/59362) for modification of an Industrial Sand Plant located at the same address. This existing operation consists of a rotary dryer, pebble mills, air classifiers, storage bins, and associated equipment used to produce industrial sand. Wet suppression and dust collectors are used for pollution control. The requested modification is to make improvements to the rotary dryer system. There would be physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Smith is the assigned Division person.

For the Madison County "Jackson Sun-Daily"--published once on or before Thursday, May 18, 2006.

The applicant is Union City Grain Company LLC with a mailing address of P.O. Box 278, Union City, TN 38281. They seek to obtain an air contaminant permit (Division identification number: 66-0059-01/59202) for modification of a Grain Processing and Handling Operation located at 315 W Dr. Martin Luther King Jr. Drive, Union City, TN 38261. The existing permitted grain elevator has proposed the following changes to their permitted operation: grain dryer #2 (source 02) would be removed; the fertilizer operation is no longer owned or operated by the facility; the amount of grain processed would be changed; improvements are being made on a conveyor serving truck receiving dump pit #3 (source 04); and a truck receiving pit (source 13), would be

upgraded. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. E. Flowers is the assigned Division person.

For the Obion County "Union City Daily Messenger"--published once on or before Thursday, May 18, 2006.

The applicant is Sertapak USA with a mailing address of 3099 Barry Drive, Portland, TN 37148. They seek to obtain an air contaminant permit (Division identification number: 74-0128-01/59268) for modification of a Surface Coating Operation located at the same address. This existing operation consists of a paint spray booth and associated equipment used to coat steel shipping racks. Exhaust filters are used for pollution control. The proposed modification is to increase volatile organic compound usage. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Reynolds is the assigned Division person.

For the "Robertson County Times"--published once on or before Thursday, May 18, 2006.

The applicant is Sitework G. T. Inc. with a mailing address of 210 Juniper Drive, Murfreesboro, TN 37129. They seek to obtain an air contaminant permit (Division identification number: 95-0286-01/59395) for the installation of a Rock Crushing Operation on Benders Ferry Road, Mount Juliet, TN 37122. This proposed operation would consist of a crusher, two (2) conveyors, and associated equipment used to produce crushed limestone aggregate. Wet suppression would be used to control particulate (TSP) emissions. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Medley is the assigned Division person.

For the Wilson County "Lebanon Democrat"--published once on or before Thursday, May 18, 2006.
